EyeSpecialists
clearly better

**There's More To This Practice
Than Meets The Eye**

Academy of Ophthalmology and the American College of Surgeons. He received his M.D. from George Washington University School of Medicine in Washington, D.C., and completed his residency in Ophthalmology at the University of Pennsylvania Scheie Eye Institute, and a fellowship in Cornea and External Disease at Emory University in Atlanta.

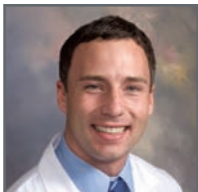

Treatment that goes beyond.

The professionals at Eye Specialists believe in a holistic approach to eye care. They are proactive in recommending lifestyle changes that can assist in the well-being of their patients' eyes and health.

Patients routinely learn how nutrition and exercise play a role in healthy eyes. This is especially true with Macular Degeneration where studies suggest that regular physical exercise can significantly reduce the risk of age-related Macular Degeneration. Eye Specialists' patients are also counseled on other factors that may affect their vision including weight and cholesterol control, sun restriction and Dr. Lamensdorf's strongest recommendation – stop smoking. He will even sponsor a patient's "Stop Smoking" program! Proper skin care products and their application can also help eliminate or reduce dry eyes, chronic inflammation, dark circles and fine lines. An integrated approach to eye care not only results in improved vision, but often in a healthier life.

Always improving.

Eye Specialists will soon offer Oculoplastics, which involves eye and facial medical procedures that can improve a patient's look and vision. Dr. David Sabin, Optometric Physician, joined Eye Specialists to assist in the care of surgical patients and to oversee their comprehensive contact lens service.

Dr. David B. Sabin

As you can clearly see, there really is more to this practice than meets the eye. It's a place where people go to rediscover how great life can be. If you're looking to improve the way you look, feel and see, discover the difference at Eye Specialists.
